## **DETAILED ACTION**

### ***Specification***

1. The abstract of the disclosure is objected to because it contains legal phraseology. Correction is required. See MPEP § 608.01(b).
2. The disclosure is objected to because of the following informalities: Reference numeral 9 is used for the hollow line in line 1 of page 16 and for the dispensing opening in lines 10 and 11 of page 16. Reference numeral 8 (line 9 of page 17) and reference numeral 4 (line 12 of page 17) are both used for the dispensing unit. In line 3 of page 23, reference numerals 4 and 8 are both used for the dispensing opening.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Pham (U.S. Publication No. 2002/0082564). Pham discloses a device having a receiving unit (14) and a dispensing unit (26) with a dispensing opening (28). The device is configured as a fish.

Art Unit: 3767
